

## 2018 Ramp Construction Notice

The City of St. Cloud has scheduled two construction projects in 2018 that will affect parking in the East River's Edge Parking Ramp (including Best Western Plus Kelly Inn Ramp Parking) and the Grand Central Parking Ramp. These projects will include concrete repairs, surface patching, and drive lane improvements, which can produce general construction conditions (dust and debris). During these improvements, parking will be scaled back to accommodate safe working conditions for staff, and citizens utilizing the facilities.

Estimated start date: June 1, 2018

The **Grand Central Ramp** rehab project will affect the entire ramp, however, parking will be available in select areas. Small sections will be closed at a time (approximately 20 stalls at one time) to minimize the impacts on parking. If you are a contract card holder for the Grand Central Ramp, overflow parking will be available in the Mississippi Lot (metered lot in front of Kelly Inn) if the ramp becomes full. Signage will be posted in the Mississippi Lot when these arrangements take place.

Estimated start date: July 1, 2018

The **East River's Edge Ramp** improvement project will affect the entire ramp and includes the Best Western Plus Kelly Inn Ramp Parking. The entrance (shared driveway) to both ramps will be CLOSED for removal of old concrete, pouring new concrete, and curing time. The project is projected to take approximately 30 days, weather permitted to complete.
