Flaaen explained a request to construct a 9' x 42' deck on the rear of the existing building. The proposed deck will be an extension of the existing deck on the same façade. The framing and supports are to be constructed with steel and the decking is to be made of aluminum. Additionally, one window will be removed from the rear façade to accommodate a new door.

Dominic Dinger was present to answer questions. Fandel asked if the vertical supports will stand in the way of traffic. Dinger stated the supports will not be in a traffic pattern.
