

The Water Treatment Facility is staffed 24/7/365. For inquires or construction-related emergencies, please call (320) 255-7225.

CONSTRUCTION PROGRESS

The final step in the water treatment process is running the water through a filter. Currently the 12 filters hold anthracite and sand, which is approximately 10+ years old and getting changed out. The new media in the super sacks is granular activated carbon (GAC), which will convert to biologically active carbon filter (BAC). The filters are washed and disinfected prior to putting in service.

FAQs

A construction website was created. The website has additional project information. Please use this link.

<https://ci.stcloud.mn.us/WaterProject>

The Webcam link is also on the Construction Website. Please click on that link for a live look at the construction project.
